

**Novant Haymarket Medical Center**  
**EMS patient care destination determinations**

Prince William County EMS units will follow the Patient Care Manual regarding the treatment and transport criteria for all patients. Trauma and burn center destination determinations are expected to be followed as normal practice.

When determining the appropriateness of transport to either Novant Haymarket Medical Center or Prince William Hospital, the following guidelines are established. Listed below are patients that **SHOULD NOT** be transported to the Novant Haymarket Medical Center and should go directly to Novant Prince William Medical Center (or a specialty center as appropriate).

- Cardiac Emergencies:
  - STEMI
  - Clinical judgment indicating a high index of suspicion of acute myocardial infarction
- Patients with an elevated risk of Ebola
  - Signs and symptoms associated with Ebola, and
  - Positive risk factor(s) of Ebola
