The Prince William Health District What You Should Know

Counterfeit At-Home OTC COVID-19 Diagnostic Tests

The FDA is aware of counterfeit at-home over-the-counter (OTC) COVID-19 diagnostic tests being distributed or used in the United States. These counterfeit tests **should not** be used or distributed.

Counterfeit COVID-19 tests are tests that are **not** authorized, cleared, or approved by the FDA for distribution or use in the United States, but are made to look like authorized tests so the users will think they are the real, FDA-authorized test. The performance of these counterfeit tests has not been adequately established and the FDA is concerned about the risk of false results when people use these unauthorized tests.

You may risk unknowingly spreading COVID-19 and may delay or stop appropriate medical treatment for COVID-19 if you use a counterfeit test.

The FDA has a list of [authorized at-home OTC COVID-19 diagnostic tests](#). For more information about each test, including the Letter of Authorization and authorized labeling, see [In Vitro Diagnostics EUAs: Tables of IVD EUAs](#).

What are some signs that an at-home OTC COVID-19 diagnostic test may be counterfeit?

- Poor print quality of images or text on the outside box label for the product or in the instructions for use included in the box.
- Missing information on the outside box label for the product, such as the lot number, expiration date, or barcode or QR codes.

- Grammatical or spelling errors found in product labeling.
- Components of the kits do not match the content description (for example, missing Instructions for Use, missing or unfilled components, different number of components than listed).
- Tradename for product printed on component or box labels differ from the authorized labeling found on the FDA website: [At-Home OTC COVID-19 Diagnostic Tests | FDA](#).
- The box label or printed instructions for use look different from the authorized labeling found on the FDA website: [At-Home OTC COVID-19 Diagnostic Tests | FDA](#).

Prince William Health District Covid-19 Testing Services

Residents can schedule an appointment or find testing by visiting the scheduling [website](#), visit the PWHD website <https://www.vdh.virginia.gov/prince-william/3293-2/> or call 1-877-VAX-IN-VA ((877-829-4682, TTY users call 7-1-1), Monday through Friday from 8 a.m. to 6 p.m. Assistance is available in English, Spanish, and more than 100 other languages.
