

PUBLIC NOTICE OF SOLE SOURCE PROCUREMENT

DATE: August 26, 2026

PROCUREMENT: EagleView Aerial Imagery

CONTRACTOR: EagleView (Pictometry International Corp.)

CONTRACT PERIOD: one (1) year with four (4) renewal periods

DOLLAR VALUE: \$400,000.00 (estimated)

The Department of Information Technology (DoIT) has used EagleView aerial imagery since 2011. During this period, the County has accumulated and maintained on-premises archives of EagleView-captured oblique imagery. Access to and effective use of this archived imagery requires EagleView's proprietary ConnectExplorer oblique imagery viewer.

In addition, the County's Computer-Aided Dispatch (CAD) system, Motorola PremierOne, is uniquely configured to use EagleView's viewer and associated oblique imagery. Procuring a different vendor solution could result in loss of functionality, disruption to the existing CAD integration, and reduced access to the County's historical imagery collection.

ConnectExplorer is a proprietary EagleView product, and EagleView is the sole provider authorized to furnish the software, technical support, maintenance, upgrades, and ongoing services necessary to maintain the County's existing imagery archives and CAD integration.

It has been determined that only source is practically available for the procurement listed above.

A handwritten signature in blue ink, reading "Keisha Perry".

Chief Procurement Officer, or designee

In accordance with Procurement Regulations §300.12 for Sole Source procurements.
