CIP WEB MAPPING APPLICATION
USER GUIDE
The Capital Improvement Program (CIP) Web Mapping Application is available online at [www.pwcgov.org/cipmap](http://www.pwcgov.org/cipmap). There are several ways to navigate through this web mapping application to obtain information on specific Prince William County CIP projects.

### The Map

Use your mouse scroll wheel to zoom-in, zoom-out, or left-click to pan around the map to go to your desired location. You can also use the toggle switch found on the top left corner of the map to zoom-in (+) and zoom-out (-). To go to the initial extent (countywide) of the map, click the house icon in that same toggle switch.

Hovering over each icon on the map will provide you with a tooltip (small pop-up) that indicates the project name. You can click the icon to reveal a brief description about the project, as well as a link to the full document about that particular project.
Side Menu

Each CIP project can be found on the left-hand side of the application. Each is indicated by a small thumbnail photo, as well as the project name. Clicking each project from the side menu will reveal a brief description about that project in a window that appears on the map (the same window that appears when the icon on the map for that project is clicked).

Tabs

The CIP projects are broken up into functional areas. Projects that fall in these specific functional areas can be easily accessed by clicking one of the tabs found towards the top of the application, underneath the banner. In addition to the functional area tabs, a countywide project tab is included. Notice as you click each tab, the projects (icon and side menu items) change to only highlight projects in that functional area.
Magisterial Districts Bookmark

Towards the top right corner of the application is a drop-down menu that lists all Prince William County magisterial districts. Clicking each magisterial district will zoom-in to the projects that are found in and around that particular magisterial district. Also, in the list is an option to zoom-out countywide.

Did You Know?

Projects with line segments associated with them (*roads and trails*) are included on the map to give an approximate visual of the extent of that particular project. Hovering over or clicking the line associated with the project will indicate the project name.

Questions?

If you have any questions regarding the CIP, please visit the Office of Management & Budget [website](#). If you receive an error or experience technical issues with the mapping application, please send an [email](#) to the GIS Division.
