Coming Soon... 2021 Dumpster Day Schedule

Dumpster Days are facilitated by PWC Department of Public Works Neighborhood Services Division & Solid Waste Division. The events **are open for use by all County residents**. We encourage residents to take part in organizing or participating in a community cleanup in their neighborhoods. Volunteers can participate in area litter pickups or simply utilize the free County dumpster to remove clutter and debris from their yards or other areas around their home.

****HOAs and other neighborhood groups who wish to hold their own community cleanups should contact our community non-profit partner Keep Prince William Beautiful at kpwb.org or 571-285-3772.****

Neighborhood Leaders Group Update...

Many of you have expressed that you are experiencing COVID-19 pandemic fatigue; therefore, Neighborhood Services has not moved forward with scheduling our monthly meetings. If you would like to resume our monthly NLG meeting virtually, please let us know what topics you'd like to cover and we will create a calendar for the remainder of the 2021. Kindly email your topics to the Neighborhood Coordinator at choltzlander@pwcgov.org. Thank you!

PROPER TECHNIQUE FOR SHOVELLING SNOW

8 Ways You Can Help With Snow Removal in Your Community

Road snow removal in Prince William County is led by the Virginia Department of Transportation. But what about the sidewalks and other areas around your home or business?

The State and the County **DO NOT** clear snow and ice from public walkways (sidewalks and trails). While not legally obligated, residents and businesses are asked to help keep sidewalks safe (homeowner associations may require members of their communities to clear walkways near their property). You should, as soon as possible, clear snow off the sidewalks in front of your property so that all pedestrians, especially school children, people with disabilities and the elderly, may walk securely as conditions improve.

Eight ways you can help:

1. Start a Neighborhood Team to help shovel snow for elderly and those unable to shovel. And please be aware of the risks for people with heart conditions.
2. Residents and businesses should ensure all accessible parking spaces for people with disabilities are cleared of snow and ice.
3. Don't put trash cans and recycling bins out until after the plows have come.
4. If possible, remove parked cars from the road. Navigating around objects severely hampers a plow or heavy equipment driver's ability to clear the roads and costs valuable time.
5. Clear snow away from fire hydrants in your neighborhood. Ask neighbors to adopt a fire hydrant and clear snow and ice away from all hydrants so that they are easily visible in the event of a fire.
6. Shovel snow into the yard instead of into the street to minimize the problem of the snowplow covering your driveway with snow after you've just shoveled it.
7. Keep the openings of storm drains clear of snow and debris to help alleviate potential flooding and to protect the environment. (At no time, however, should a resident attempt to enter a storm drain to remove debris.)
8. Volunteer to use or lend equipment such as small snow blowers for a community removal effort.

3rd Annual Native Plant Symposium for Beginners

Registration is Now Open for “**Stop Mowing, Start Growing**” the **3rd Annual Native Plant Symposium for Beginners**. This year the symposium will be virtual and somewhat shortened to better fit the online format.

DATE: February 6, 2021, **Saturday**
TIME: 9AM to Noon
LOCATION: Online
COST: \$5
REGISTRATION LINK: <https://nps2021.eventbrite.com/>

The symposium is designed to introduce land owners to the benefits and beauty of using native plants in the landscape.

Our Keynote Speaker will be Alonso Abugattas. Alonso is known as the “Capital Naturalist” on social media and is a Natural Resources Manager with Arlington County.

Two (2) breakout sessions may be attended in addition to the Keynote speaker. Breakout Sessions will be provided by local non-profits and agencies who specialize in using natives and will cover topics such as: **meadows, native plants for suburban yards and small properties, planting to sustain and create native forests.**

Three new topics this year by popular request: an **introduction to soils, site assessment and design** and **natives for waterfront properties**. The material covered can be applied to properties small and large, suburban and rural, HOA common land and private lots.

This event is sponsored by [Prince William County's Watershed Management Branch](#), the [Virginia Native Plant Society](#), the [Prince William Conservation Alliance](#), [Prince William Soil and Water Conservation District](#), [Plant NoVa Natives](#), [Virginia Cooperative Extension](#), and [Northern Virginia Community College](#).

For questions, please call 703-792-7070.

LITTER IN AMERICA

Results from the nation's largest litter study

KEY FINDINGS: THE COSTS OF AMERICANS LITTERING

The 2009 National Visible Litter Survey and Litter Cost Study* documents the direct and indirect costs of litter to communities, schools, and businesses. While visible roadside litter is down 61% since 1969, litter, and littering behavior, remains a persistent and costly problem.

BREAKDOWN OF DIRECT LITTER COSTS IN THE U.S.

**Litter clean up costs the U.S.
more than an estimated \$11.5
billion each year.**

- Businesses pay \$9.1 billion of clean up costs, or about **80%**.
- States, cities, and counties together expend \$1.3 billion on litter abatement. **Litter removal is often a hidden cost within employee expenses or other projects which makes it difficult to determine the actual cost to local governments.**
- Educational institutions spend approximately \$241 million dollars annually for litter clean up. **Similar to local governments, litter costs are often not included as a budget line item, making it difficult to determine the time spent on cleanup in hallways, cafeterias, and sports facilities.**
- Many communities depend on volunteers to clean up litter, a trend that will likely grow.
- Continuing population growth—about 3.5 million/year—will strain litter abatement efforts. Even if litter is reduced on a per capita basis, more people will tend to result in more litter.
- As the U.S.—along with state and local governments—struggles economically, budget cuts may reduce tax-funded litter clean-up programs.

THE INDIRECT COSTS OF LITTER ON QUALITY-OF-LIFE ARE CONSIDERABLE.

Indirect costs include the degree to which litter reduces the value of real estate, deters a customer from entering a business, or a new employer from locating to a community. To measure these impacts of litter, the 2009 study surveyed homeowners, realtors, and business development officials.

- **93% of homeowners say a littered neighborhood would decrease their assessment of a home's value and influences their decision to purchase a property.** And 40% estimated that litter would reduce a home's value by 10% to 24%.
- 36% of business development officials say that **litter impacts a decision to locate to a community.**
- 55% of realtors think that **litter reduces property values by about 9%.**
- 60% of property appraisers **would reduce a home's value if it was littered.**
- **The presence of litter in a community decreases property values by a little over 7%,** according to the National Association of Home Builders pricing model.

LITTER IN AMERICA

Results from the nation's largest litter study

LITTER HAS COSTLY ENVIRONMENTAL CONSEQUENCES.

- The environmental outcomes of litter can have economic impacts. This includes lost tourism revenues, expenses for repairing vehicles, boats and ships, restoration of ecosystems, wildlife injury, and eventually the cost to human health.
- Debris may be carried by storm drains into local waterways, with potential for serious environmental contamination. Wind and weather, traffic, and animals all move litter into gutters, lawns and landscaped areas, alleyways, and parking structures.

DIRECT COSTS OF LITTER	
ENTITY TYPE	COST (IN MILLIONS)
States	\$ 363
Counties	\$ 185
Municipalities	\$ 797
Businesses	\$ 9,128

Neighborhood Services' Mission is to assist residents understand, abide by, and raise concerns about compliance with Property Codes. The Codes are the basis for and guide the way we work together to maintain adequate health, safety and quality of life in the places where we live, work and enjoy Prince William County.

Property Code Enforcement staff members work to ensure our communities are properly maintained by educating and enforcing, when necessary the following:

[Prince William Zoning Ordinance](#) (regulates how land is used)

[Building Maintenance Code](#) (regulates safety and structural elements of existing structures)

[Spot Blight Program](#) (addresses extremely deteriorated properties)

[Illegal Roadside Signs](#) (signs placed illegally in the road right-of-way)

[Tall Grass and Weeds](#) (seriously neglected lawns and properties)

[Graffiti](#) (vandalism that is not removed or repaired in a reasonable time)

How Neighborhood Services Help Communities Thrive...

Neighborhood Services Staff are responsible for enforcing the Zoning Ordinances of Prince William County. The goal of this enforcement is to ensure properties in Prince William County are maintained and used in accordance with the County's adopted land use requirements. The most common violations are:

- ⇒ Inoperative vehicles on private property
- ⇒ Prohibited commercial vehicles on private property (please call for clarification on this type of violation)
- ⇒ Storage of items outside in the public view including under a porch or deck or inside a carport such as trash containers car parts tools construction materials etc.
- ⇒ Dump heap/trash storage
- ⇒ Illegal accessory structures
- ⇒ Illegal businesses*
- ⇒ Over occupancy
- ⇒ Graffiti

*Illegal businesses are those who have not secured proper permits and/or zoning approval to operate within a residential neighborhood.

It is important to note: 1) Inoperative vehicles on the **public streets** should be reported to the **Prince William County Police** non-emergency number at **703-792-6500**. 2) Neighborhood Services staff do not issue zoning permits or approvals. Permits and approvals are issued by [Zoning Administration](#) within the [Planning Office](#) 703-792-7615.

Should you notice a property code issue in your community, please report it to us via our [online reporting form](#) so that we can assist. If you prefer to speak to someone, please call our Intake Staff at 703-792-7018.

News from Fire & Rescue...

Stay Safe and Warm this Winter - Winterize Your Home and Car

Winter is upon us and forecasters are predicting a wetter winter for the mid-Atlantic states. But whatever old man winter has in store for us make sure you're prepared, at home and on the road, by taking the necessary precautions to stay safe and warm during the winter season.

Winterize Your Home

Furnace and Heating Ducts

Call an HVAC professional to inspect your furnace and clean and inspect the heating ducts. Replace the furnace filter throughout the winter.

Ceiling Fans

Reverse ceiling fans to rotate clockwise allowing the fan to push warm air down and recirculate throughout the room.

Drafts/Air Leaks

Drafts can waste up to 30% of your energy use. Place draft guards or rolled up towels across the bottom of the doors; add weather-resistant caulk or weather-stripping tape around windows where there are holes, cracks and open seams.

Window Insulation

Place window insulation film on your windows; this can increase your home's energy efficiency by 70%.

Air Conditioning Unit

Drain any pipes and hoses coming from your air conditioner and cover the unit.

Fiberglass Insulation

Add fiberglass insulation in your attic, around basement doors, windows in unused rooms and window AC units.

Wrap your Pipes

Insulating pipes reduces heat loss, raises hot water temperatures and prevents pipes from freezing.

Check Smoke and Carbon Monoxide Detectors

Perform monthly checks on your smoke and carbon monoxide detectors and change the batteries when needed.

Lower the Thermostat

Lower your energy bill by setting your thermostat to 68 degrees and dress in layers of warm clothing for comfort.

Trim Trees

Trim any nearby trees to prevent ice and snow build-up that could damage property.

Prepare an Emergency Kit

Build your emergency kit that will sustain you and your family for at least 3 days/72 hours. [Build a Kit](#)

Winterize Your Car

Battery and Charging System, Cables, Terminals, Drive Belts and Engine Hoses ~ Have a certified technician check these items to prevent the risk of breaking down.

Tire Type and Tread ~ All-season tires work best in light to moderate snow conditions; however, snow tires on all four wheels are the best for winter traction; Tires should have 3/32 inches of tread; anything less should be replaced.

Tire Pressure ~ Check tire pressure frequently during winter months. As the temperature drops, so will the pressures in the tires so refill as needed.

Air Filter ~ Check the engine's air filter. If you can see through much of the filter, it's still clean. If not, it's blocked, and needs replaced.

Coolant levels ~ Ask your technician what antifreeze should be used for your vehicle and the appropriate coolant to water ratio to prevent against corrosion and potential freezing.

Lights ~ Check the operation of all headlights, taillights, emergency flashers, turn signals, brake lights and backup lights. Replace any burnt out bulbs.

Wiper Blades ~ Replace blades that leave streaks or miss spots. Consider installing winter wipers to prevent ice and snow buildup on the windshield.

Washer Fluid ~ Fill the windshield washer reservoir with a cleaning solution that has antifreeze components for cold weather use.

Brakes ~ Have your brakes inspected by a certified technician to ensure all components are in good working order.

Transmission, Brake and Power Steering Fluids ~ Check all fluids to ensure they are at or above the minimum safe levels.

Winter Driving Safety Tips

- Leave earlier for your destination.
- Use main roads or arteries whenever possible.
- Use your knowledge of the area to your advantage.
- Expect traffic to travel at a slower pace.

Additional Safety Tips

Stay informed about emergency alerts and important information by signing up for [PWC Alerts](#), and keeping a NOAA weather radio handy for updates. For information about Prince William County government, go to the emergency information [portal](#). **NEIGHBORHOOD NEWS**

News from Parks, Recreation & Tourism...

Parks, Recreation & Tourism Unveil RECREATION MAPPER - A New Online App to Find Fun Things to Do, See & Visit in Prince William County.

In order to better inform the public on recreational opportunities in Prince William County, the Department of Parks, Recreation & Tourism (DPRT) has developed an online application called the Recreation Mapper. Work on the application began in earnest in the Summer of 2020, with an initial public release in November 2020. The Mapper takes geospatial data from parks and other recreation sites in the County and displays it on an easy to use map-based interface. The Recreation Mapper was built using ESRI's ArcGIS Online platform.

Users will be able to view the sites on a map and learn more about the amenities and activities offered at each site. To offer a more wholistic view of all the great recreational opportunities in the County, sites and information from Federal, State, and local entities were included. Robert Boyd, DPRT GIS Analyst, explains "The goal of the Recreation Portal is to allow locals and visitors to discover all of the amazing opportunities for indoor and outdoor recreation that Prince William has to offer. Whether citizens want to get in a workout, go on a hike, or just spend a day playing at the park, this tool will show users what's available and how to find it. I hope that the Mapper shows users the good times that are waiting just down the street."

Recreation Mapper may be found at <https://bit.ly/DPRTrecportal>

We would appreciate your feedback on the new Recreation Mapper app, and invite you to participate in the following short survey: <https://survey.alchemer.com/s3/6137046/Recreational-Mapper-Survey>

Important News from Solid Waste...

Yard Waste Collection and Apartment Recycling Changes in 2021

New Refuse Code Changes Effect the Entire Community

On December 15, 2020, the Prince William Board of County Supervisors unanimously approved changes to Chapter 22 (Refuse) of the County Code. The key change is the mandatory separation and curbside collection of yard waste. The yard waste program will be seasonal, running from March through December, but will not take effect until October 2021 to allow waste haulers time to equip and staff appropriately.

Residents, businesses, apartments, landscapers, etc. will be required to arrange for a separate collection of yard waste, leaves and brush. Once the program starts, residents may place yard waste in biodegradable paper yard waste bags, or a personal container labeled for "yard waste." The collected yard waste will be converted into a soil amendment product at the recently expanded Balls Ford Road Compost Facility versus landfilled. In addition to yard waste collection, residents will also have access to Christmas Tree recycling during the first two weeks of January each year.

Some of the benefits of a separate yard waste collection are:

- Diverts yard waste from the County landfill which expands the landfill life by approximately 10-15 years
- Increase County's recycling rate
- Improves the quality of compost product
- More dependable collection of yard waste material

The new curbside collection requirements will be:

- Once a week refuse
- Once a week recycling
- Once a week yard waste (March-December)
- Once a week Christmas Tree pick up (First two weeks of January)

(Note: These are minimum standards. Trash and recycling collection companies may choose to provide additional collection.)

In 2021 the actual collection period will be October 2021-December 2021 and Christmas Tree collection the first two weeks of January 2022. Yard waste collection will then resume in March 2022 for the full seasonal schedule.

There is also an important change for recycling by apartment tenants. Apartment management must provide sufficient single stream recycling collection bins for tenants. This will make apartment tenants' recycling opportunities consistent with other residential households in the County. Property managers are now required to provide tenants and employees with information about how to participate in the recycling program.

Commercial and non-residential properties are also impacted by the recent code changes. While no changes were made to the existing requirement that all businesses and non-residential properties recycle the one material generated in the greatest quantities on an annual basis, business and non-residential properties will have to adhere to the new requirements to separate and compost yard waste. In addition, the annual due date for annual recycling reports has been moved to October 15 instead of February 15.

There are several other changes that will mainly affect businesses, but all the code changes were a result of County staff and representatives of the affected stakeholder groups meeting, discussing, and deliberating the issues and the necessary changes over many months.

With these change the County realizes a goal from the 2004 Solid Waste Management Plan. "I think, these changes will significantly enhance the County's overall waste reduction efforts. I am certain that the new Code will serve the County for years to come," commented Scott MacDonald, Solid Waste Division Recycling Manager.

The new refuse code and a synopsis of the changes will be available on the [Solid Waste webpage](#).

News from Our Community Partner...

Fuller Heights Community Litter Cleanup

Keep Prince William Beautiful (KPWB) is an organization which, with the help of volunteers, strives to keep Prince William County roads, parks, and neighborhoods free from litter. One of our most impactful events to achieve our mission of a clean, litter-free community are our monthly community litter cleanups, which rotate through different parts of Prince William County every month. For our first monthly community litter cleanup of 2021, we are headed to Fuller Heights Park in Triangle, VA, which is in the Potomac District of Prince William County.

If you live, work, or play around the Fuller Heights Community, you and your family are invited to register for this community event. The cleanup takes place on Saturday, February 13, 2021 from 10am-1pm and registration is required. We will meet at Fuller Heights Park, 18511 Old Triangle Rd, and we'll spread out from there. Supplies will be provided- litter pickers, garbage bags, safety vests, and gloves (and hand sanitizer!). Please dress appropriately for this cleanup; we recommend close-toed shoes and long pants and sleeves. We will have a water filling station, so it is recommended to bring a refillable water bottle. In order to maintain COVID-19 safety measures, we are offering staggered check-in times at 10am and 10:30am to minimize contact with other volunteers, and masks are required.

For more information and to register, visit www.kpwb.org/events or reach out to our Environmental Programs Manager, Sean Morrow, at smorrow@kpwb.org.

Check out KPWB's latest *Ask the Experts* video in which they interview Amber Saxton from George Mason University's Office of Sustainability on their YouTube Channel. Follow this link: [Ask the Expert #6: George Mason University's Zero Waste Initiative - YouTube](#)

News from Our Community Partner...

2021: The Year of Plastic Pollution Awareness in Prince William County !

2020 was a challenging year with the COVID-19 pandemic. However, the District's Water Quality Programs volunteers did not relent their efforts in promoting water quality awareness around Prince William County waterways.

This commitment and passion of the Conservation District's volunteers in promoting the County's Green Community Goals go a long way. Their engagement in waterways cleanup (Adopt-A-Stream/pond), biological and chemical monitoring depicts volumes on why there is need to conserve and protect our environment and its natural resources.

This engagement also emphasizes on a change in human behaviors that pollute Prince William County's streams and waterbodies.

The issue of plastic materials in waterways, especially single used plastic bottles and plastic bags is of great concern. These plastic materials degrade into microplastics which is a big threat to aquatic lives and human health. In general, plastic bottles, plastic bags, plastic wrappers are the most dominant materials in our local waterways. These items find their way into the Potomac River and then the Chesapeake Bay. Therefore, plastics and microplastics remain a challenging issue in the Chesapeake Bay Watershed today!

What is your pledge for the Environment in 2021?

***To reduce the use of plastic water bottles?**

***To reduce the use of plastic grocery bags?**

Or

***To volunteer under the District's Water Quality Programs and promote water quality awareness for the present and future generation?**

Together, We Can All Make a Difference!

waterquality@pwsacd.org
